Education

G.H. Raisoni College of Engineering & Management 2021 – 2026
B.Tech in Artificial Intelligence – 7.69 CGPA *Pune, India*

Gramin Polytechnic, Vishnupuri 2018 – 2021
Diploma in Computer Engineering – 86.63% *Nanded, India*

Skills

Programming Languages Python, HTML, CSS

Python Libraries / Frameworks NumPy, Pandas, Flask

AI / Data Machine Learning, Deep Learning, Data Preprocessing

Database / Tools MySQL, VS Code, Jupyter Notebook, GitHub

Soft Skills Problem Solving, Teamwork, Adaptability, Flexibility

Experience

TechGeekConnect Dec 12, 2025 – Jun 11, 2026
Python Developer Intern *Wagholi, Pune*

- Developed and maintained Python-based applications, supporting backend development, application logic, and software development tasks.
- Performed data preprocessing and contributed to basic Machine Learning workflows, including data preparation and model-related tasks.
- Debugged, tested, and optimized Python scripts to improve application functionality, reliability, and code quality.
- Collaborated with the development team to analyze project requirements, implement software solutions, and support application development.

Academic Projects

Facial Expression Recognition for Mental Health Python, Deep Learning, Computer Vision

- Developed a deep learning-based system to detect human facial expressions from images.
- Used computer vision techniques to analyze emotions such as happiness, sadness, and stress.
- The system helps in understanding emotional states for mental health analysis.

Loan Eligibility Prediction Python, HTML, CSS, Flask, Machine Learning

- Developed a web-based application that uses machine learning to predict loan approval eligibility for borrowers.
- Trained and tested the model, achieving an accuracy of 80%.
- Built the application using Python, HTML, CSS, and Flask.
- Users can input personal and financial data to receive a loan eligibility prediction.

COVID-19 Update Tracker Python, API, Web Scraping

- Developed a Python-based application to track real-time COVID-19 statistics.
- Used web scraping and APIs to collect updated data from online sources.
- Displays the latest global COVID-19 statistics.

Certifications

Python Programming – Naresh IT, Hyderabad

Digital Skills: Artificial Intelligence Virtual Experience – Accenture
